

ANDRIY CHERNENKO

Full-Stack Developer (Vue / Node.js / TypeScript)

Cherkasy, Ukraine | +380 63 364 7129 | andrey.chernenko008@gmail.com | GitHub: github.com/Jez-er | LinkedIn: linkedin.com/in/andriy-chenenko-732679280

PROFESSIONAL SUMMARY

Full-stack developer with about 2 years of commercial and freelance experience building production web applications with Vue 3, React/Next.js, TypeScript and Node.js (NestJS). Independently designed, built and operate a microservices platform end-to-end: API gateway, JWT authentication service, event-driven communication (RabbitMQ), PostgreSQL, Redis caching, automated tests and CI/CD — all code public on GitHub. Strong focus on front-end architecture, server-side rendering (SSR), SEO and performance optimization.

TECHNICAL SKILLS

Frontend: Vue 3, TypeScript, JavaScript (ES6+), React, Next.js, Vite, Pinia, Tailwind CSS, HTML5, CSS3, SSR, SEO, responsive design

Backend: Node.js, NestJS, REST API design, microservices, JWT authentication, RabbitMQ, gRPC (basic), Java / Quarkus (working knowledge)

Databases: PostgreSQL, Prisma ORM, Redis (caching, sessions), SQLite

DevOps & Tools: Docker, Docker Compose, Traefik API gateway, GitHub Actions (CI/CD), Git, Linux

Testing: Jest, unit testing, integration testing in CI

WORK EXPERIENCE

Full-Stack Developer — Atlas — self-initiated production-grade platform | Dec 2025 – Present

- Designed and built a language-learning platform as a microservices system: Traefik API gateway with centralized authentication (ForwardAuth), 5 backend services, RabbitMQ event bus.
- Implemented an authentication service in Java (Quarkus): JWT access/refresh token flow with Redis-backed sessions, bcrypt password hashing, gRPC inter-service calls.
- Built core NestJS services (courses, billing, vocabulary, mail) with PostgreSQL + Prisma migrations and Redis cache-aside caching with invalidation.
- Developed the admin and user front-end in Vue 3 + TypeScript (Pinia, vee-validate + valibot, Tailwind CSS): course editor with drag-and-drop lesson ordering, subscription plans management.
- Set up CI/CD with GitHub Actions: Jest unit tests running against real PostgreSQL/Redis services, Docker image build and publish.

Source code: github.com/Atlas-lang-tech

Front-End Engineer — T-Auto Logistics (Remote) | Mar 2025 – Nov 2025

- Owned the full front-end development cycle for a logistics platform (React, Next.js, TypeScript) — from architectural planning through implementation and release.
- Rebuilt the front-end with server-side rendering (SSR), improving page load performance and organic search visibility (SEO).
- Led a large-scale refactor of the front-end architecture, improving maintainability and reducing feature delivery time.
- Built a custom auction module with AI-assisted features from the ground up.
- Redesigned UI/UX across core user flows, improving usability and user engagement.

Full-Stack Developer — Freelance (Remote) | Mar 2024 – Feb 2025

- Designed and delivered web applications for multiple clients — from internal tools to customer-facing products (Vue, Node.js, REST APIs, PostgreSQL).
- Owned architecture decisions end-to-end: server-side logic, REST API development and front-end implementation.
- Worked directly with clients: requirements gathering, iterative delivery, support after release.

PET PROJECTS

PASS-MAN — CLI password manager written in Rust (AES-256 encryption, SQLite storage, modular command architecture). github.com/Jez-er/PASS-MAN

EDUCATION

College of East European University named after Rauf Ablyazov — Software Engineering / Computer Science, 2026 – Present

LANGUAGES

Ukrainian (native) • English (intermediate, B1) • Polish (basic)
